Research

The d3.js parallel coordinates view has been successfully loaded to the web browser. Tomorrow I will finish features of color mapping and dataset/model parameter setting to make it usable, as well as the MDS view to project all data to the scatterplot view.

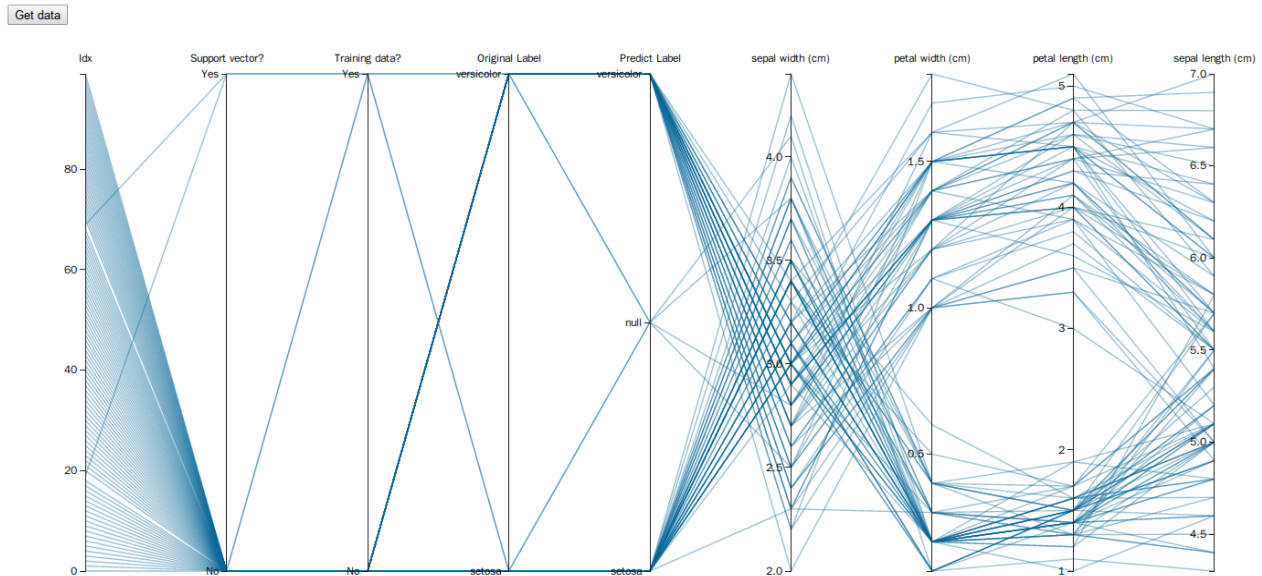

Figure 1: Snapshot of current PCP view.

Attic

After the weekly meeting, I finished the minute and made an initial version development document about necessary developing resources and coding styles. Also I discussed with Xiaohong to

Plan for Tomorrow

- Finish features and the view mentioned above;
- finish the JCST submission.
